## Melinda Grieco, RN, Telehealth Coordinator

- RN, ACLS Certified
- MS Cardiopulmonary Science and Clinical Exercise Physiology
- 14 Years of Cardiopulmonary Clinical Practice
- Role:
  - Evaluate and monitor patients with cardiopulmonary disease via Telehealth and home visits
  - Coordinate services between patients and physicians
  - Serve as a clinical resource to Northeast HomeCare nurses and therapists

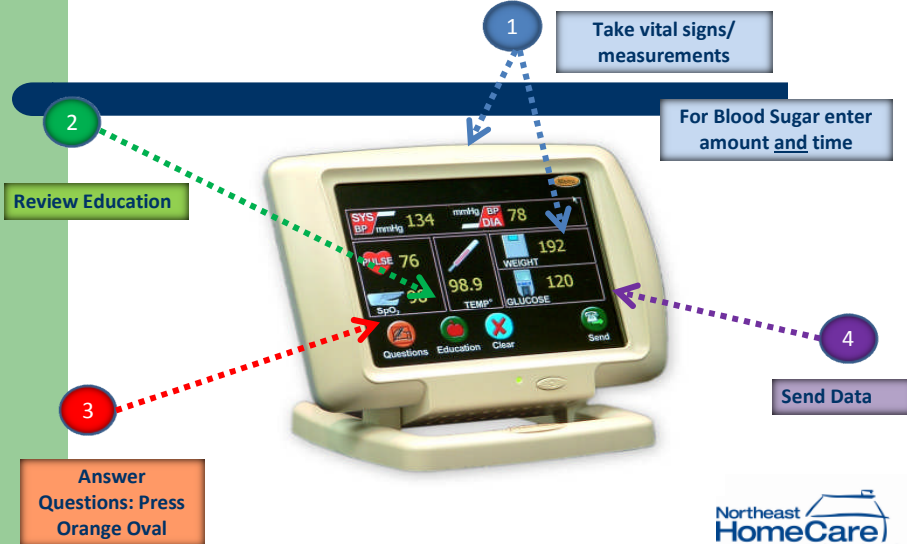

## Program Highlights

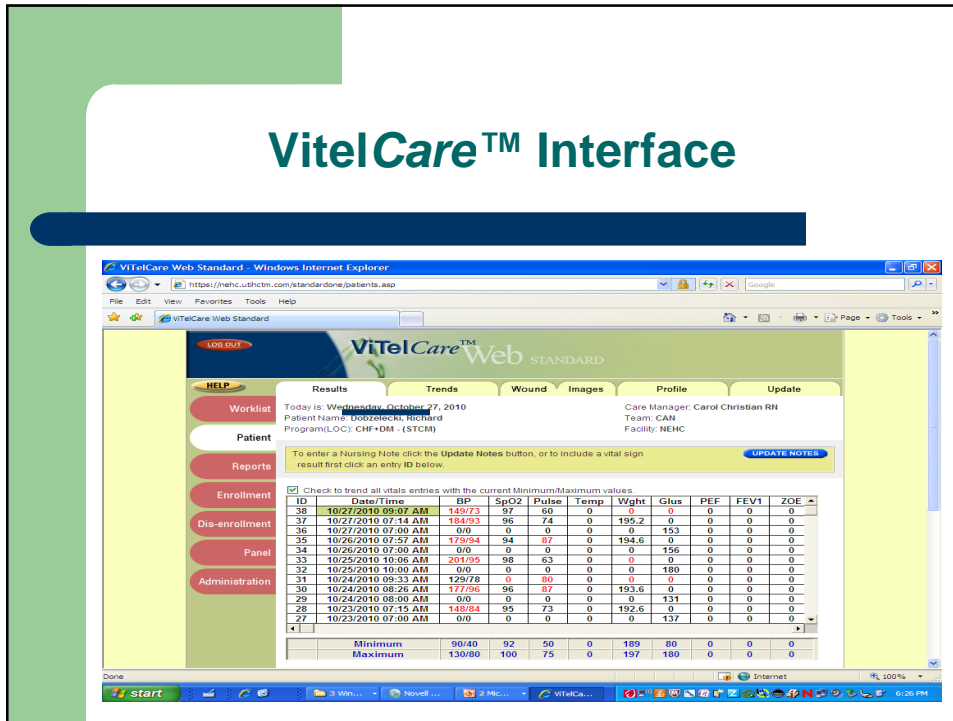

- State-of-the-Art Equipment and Software
- Daily monitoring and follow up by trained RN
- 7 days per week coverage
- Education and symptom management

## Bosch VitelCare Monitor

## VitelCare™ Interface

## How You Benefit

- Patients on Telehealth remain at home and out of the hospital 50% more than those without Telehealth
- Patients learn the connection between lifestyle choices and worsening of symptoms
- Patients report improved quality of life, more independence

## Your doctor

- Receives regular updates on your progress
- Can make changes to your medications based on your daily readings
- Is prepared with all your information when you arrive for your office appointment

## “Call Us First”

- Your nurse will teach you to watch for signs of trouble
- “Call Us First” if you are not feeling well
- A nurse will help determine what the best next step is
- We are available 24 hours a day, 7 days a week
